Full Stack Web Developer & Software Engineer

Disciplined United States Air Force Veteran with strong core values of integrity, excellence, and respect. Passion for emerging technologies. Professors and peers consistently praised me as proactive, diligent, and oriented. Ability to adapt quickly with teams, technologies, develop and engineer highly complex applications, individual projects, while excelling in solving problems with a strong desire to increase real-time efficiency and testing. Also proficient in Spanish.

Technical Skills

Languages: JavaScript, React, HTML5, CSS3, Node, Python , Express, JSON, jQuery, Redux
Database: MySQL, MongoDB, SQL, PostgreSQL, NoSQL, Firestore
Other: Heroku, Git, Command Line, Agile Methodologies, D3, Problem Solving, Communication Skills, Bootstrap, Firebase, Microsoft Office Suite, Computer Science

Projects

Alyssandrak.com - Beauty Salon
2020 – 2021
Designed & maintained website for high functionality, easy navigation, and responsiveness.
- Built a full responsive scalable web application.
- Tools used: HTML5, SASS, React, Material-UI, and Firebase.

Alertify- http://alertifynow.herokuapp.com/ | https://github.com/MarkKelly00/Alertify
2020 – 2020
Interactive modular web application to alert emergency contact/s via one click.
- Developed Alertify with fellow classmates at the University of Oregon. Alertify works on mobile and web browsers, the user creates a list of emergency contacts that they want to Alert in a situation. This sends a text of their current location to contact.
- Tools used: HTML5, Materialize CSS, JavaScript, jQuery, Node, MongoDB, and Google Maps API

CodeLocker - https://codel0cker.herokuapp.com/ | https://github.com/MarkKelly00/codeLocker
2020 – 2020
Full-stack web application that allows developers to save their code in a personalized Locker or share with the CodeLocker community.
- Designed an app for all developers to execute code in an embedded console with option to save for future referencing. This allows the ability to keep code private or share with others in the CodeLocker community. Used MERN stack for efficiency and scalability.
- Tools used: MongoDB, Express, React, Node.JS, Auth0, HTML5, TailwindCSS, and Javascript

Experience

Freelance Web Developer
Remote
Full Stack Web Developer
10/2020 - Current
- Developed responsive full stack web applications..
- Planned, wrote, and debugged web applications with accuracy.
- Maximized applications' efficiency, quality, scope, operability, and flexibility.
- Integrated other APIs for Google Maps, and other services..

UNFI
Ridgefield, WA
Reach Lift Operator/Associate
06/2011 - 04/2020
- Restocked/Replenished while taking accountability of all floor merchandise.
- Played a vital role in the transport of merchandise.
- Made sure the product is safely packaged and is placed in an orderly fashion.
- Influenced a positive workplace culture and developed team support of solutions.

United States Air Force
Malmstrom AFB, Montana
Missile and Space Systems Technician (2M0X2)
01/2009 - 04/2011
- Serviced, maintained, and supervised actions on missiles, unmanned air vehicles (UAV), boosters, payloads, research and development (R&D) systems, environmental blast doors and valves, associated subsystems, components, and support equipment (SE).
- Operations of launches, tracks, and recovers of UAVs while maintaining related equipment. Performed acquisition and activation activities.
